Professional Summary

Software Quality Assurance Engineer with 2-year Experience, Specialized in **Automation** testing, **Mobile Automation** Testing and **Manual** Testing, Highly Skilled at analyzing **Business Requirements**, **Test case creation**, **Defect management** in **JIRA** & maintaining **Agile quality assurance** model by Coordinating with Multiple teams. Seeking position in Software industry with proven ability to manage projects and lead backed by current work experience in software industry

Extensively worked on

Automation Testing, Manual testing, Mobile Testing, Agile Project management, JIRA, POSTMAN, Selenium, MS Office.

Work Experience (About 2 years of experience as a Quality Analyst)

Quality Analyst –Capgemini Technology Services India Limited   **January 2022 – Till date**.

Skill Sets

Automation Testing	SQL	Selenium
Manual testing	JIRA	Test Ng
Mobile Testing	Postman	MS Office
Agile Project management	JAVA	QA/ QC Standards

Manual Testing Project Undertaken

Technology / Environment : Manual Testing, Sanity Testing, Web Testing, Integration Testing, SQL, Functional Testing, JIRA, CI/CD.

Team Size   : 6 members

Roles and Responsibilities   : Writing the test case according to the business requirement. Through Testing the Resort booking application, Testing the flow between multiple channels validating the requirements, finding the bugs, Reporting the defect, manage the defect in JIRA, Trouble shooting, Retest the defects, close the defect.

Data Migration Testing Project Undertaken

Technology / Environment **:** Manual Testing, Regression Testing, Sanity Testing, Web Testing, Integration Testing, SQL, Functional Testing, JIRA .

Team Size **:** 4 members

Roles and Responsibilities **:** Lead the team in testing the data base of the resort booking application, Migrated the data from the data base by SQL, Testing the obtained data against the test cases, Integration testing between the multiple channel whether the data flow is proper across the channels.

Web application Testing Project Undertaken

Technology / Environment **:** Manual Testing, POSTMAN, Integration testing, JIRA ,Selenium , JAVA.

Team Size **:** 5 members

Roles and Responsibilities **:** Testing the WEB application**,** Writing the test case according to the business requirement. Through Testing the Resort booking application, Testing the flow between multiple channels validating the requirements, finding the bugs, Reporting the defect, manage the defect in JIRA, Trouble shooting, Retest the defects, close the defect.

Mobile Automation Testing Project Undertaken

Technology / Environment **:** Automation Testing, POSTMAN, Regression testing, JIRA ,Selenium , JAVA.

Team Size **:** 8 members

Roles and Responsibilities **:** Testing the Mobile application by **Pcloudy,** Writing the test case according to the business requirement. Testing the application with selenium JAVA.

Roles and Responsibility

- AGILE methodologies| WEB Testing | Mobile testing |System testing
- Defect management in JIRA throughout **SDLC / STLC**
- Functional | Nonfunctional |Black box| End to end testing
- Test design and Test automation, Testing documentation, Defect creation and maintenance, Team management, Test design, Quality management.
- Expert in **Regression** testing, **Smoke** testing, **Integration** testing, **Acceptance** testing.
- Retest, Troubleshooting the application to resolve issues and to track development and testing tasks in **JIRA**.

- **GUI** testing, **Web Automation** testing, **Compatibility** testing and **UAT**.

- Good knowledge in **API** and **ETL** testing

- Updating and modifying test cases to match consistently update software requirement from business and **CI/CD**.

- **Mobile** Automation using P**ostman API** calls | Agile model | Waterfall model | Kanban model

- **Unit** testing, **Negative** testing, **System** testing, **Backward** compatibility testing

- Delivering quality software through quality control test reports, determining software quality and readiness for release maintaining **QA** & **QC** standards

Education

Bachelor of Engineering - Jawaharlal Nehru National College of Engineering, Shivamogga (2021)

Languages Known

English – Fluent   **Kannada** – Native   **Hindi** – Advance   **Telugu –** Advance

Certifications

Scrum development with Jira and JIRA Agile By Xavier Morera

Agile Software Development By University of Minnesota
